

Pine Oil Disinfectant

Article No. 6789 (473 mL/16 fl. oz.) (U.S.)

Article No. 6791 (1 litre) (Canada)

Watkins Pine Oil Disinfectant is an aromatic deodorant and germicide for your entire home. Because of its germicidal properties, grease-dissolving action and deodorizing qualities, it is excellent for all your tough cleaning jobs. U.S. and Canadian regulations require different formulations to meet government definitions for germicides—each is the best product available on its side of the border!

Why Watkins?

- **Effective germicide:** Pine oil contains naturally-occurring phenol—kills household germs; disinfects as it cleans; sanitizes laundry when used with regular detergent.
- **Multi-purpose formula:** High-powered grease cutter/thorough deodorizer; strong enough to dissolve grime and film; gentle enough to help launder baby's diapers.
- **Versatile:** Use anywhere germ-killing power is desired—in scrub water; in the laundry; in the bathroom; in public places; in garbage receptacles
- **Convenient:** all-in-one germicide cleaner; no scrubbing; no rinsing for most jobs.
- **(U.S. formula) Concentrated:** Four times stronger than leading commercial products; economical—takes less to do more.
- **(Canadian formula) Fortified:** Pine oil's performance is boosted with another powerful germicide.

Note: U.S. Product Shown

Tip

This versatile product will boost the grease-cutting and germ-killing power of any cleaning solution. It can be added to diluted Organic Cleaner and Degreaser solutions for spray-and-wipe cleaning, and is a great addition to the laundry.
